

# Accessing Meditech from your home network using the Internet

**NOTE: You cannot get into Meditech while you are logged into the VPN. You will have to disconnect the VPN session before attempting to access Meditech from home.**

Open Internet Explorer and in the Address bar, type in: <https://mrmcweb.org> and press the Enter key.

Type in your Milreg credentials in the Username and Password fields and click on Login.

**Authorized Access Only  
For Technical Assistance  
call the MRMC Help Desk  
(508) 422-2482**

Property of MRMC

Click on the Meditech icon at the left side of window.

AnyConnect

 **Start AnyConnect**

Initiate an AnyConnect client session to provide client applications on your desktop with network access through your VPN, depending on your company's VPN configuration and your own network access rights. For example, an AnyConnect session might be necessary to use Microsoft Outlook or Microsoft Outlook Express to send or receive e-mail.

The following instructions describe how you can use your browser to get remote access to Microsoft Terminal Services running on computers in your network:

- [Requirements](#)
- [Before you Connect - Add to Trusted Sites](#)
- [How to Connect](#)
- [Always Log Out!](#)

**Requirements**

To access remote services over an AnyConnect client session, your system must have the following setup:

- Your VPN site must be in the list of trusted sites, as described below. (Required for Windows 7 and Vista,

javascript:openApp('rdp') Internet

In the middle of the window, under the Meditech title bar, select [Click here for Meditech](#).

A pop-up screen will appear asking if you trust the computer you are connecting to. Click on Yes.

### Terminal Services Client Help

The Microsoft Terminal Services Client provides any Sun Java 1.4+ equipped browser with access to corporate terminal servers.

#### How to Connect

To connect to Microsoft Terminal Services, do one of the following:

- Click a link to the computer on this page to connect to it (assuming your system administrator added the link).
- Choose the rdp:// option next to the Address field, enter the name of the host into the Address text box along with any optional parameters you want, then click Browse. For example:

**rdp://myterm**

See [Completing the Address Field](#) for the parameter options.
