

December 27, 2015

Dear Mr. Ciaramicoli,

I recently had the opportunity to be treated by physicians from tri-county medical associates.

During my annual physical Dr. Donna Krauth, my primary care physician, diagnosed an enlarged uterus. Dr. Krauth has been my primary care physician for many years and has always done a tremendous job on my behalf. She immediately scheduled tests and referred me to Dr. Brenda Coutinho when I first met Dr. Coutinho she told me she had been studying my tests for a week. She was so well prepared. She had mapped out a plan for my surgery which would result in the removal of a large mass from my abdomen as well as a hysterectomy. She included Dr. Horowitz in the surgery as well. The surgery went very well. Dr. Coutinho did a great job following up on my care. After I was released from the hospital, she called with pathology results whenever they became available. From the first appointment she explained everything that was happening. Her energy, enthusiasm and compassion gave me a great deal of confidence in my recovery. I feel she was truly a blessing. The mass did turn out to be cancerous and I believe Dr. Krauth's diagnosis and Dr. Coutinho's quick action and excellent treatment

Prevented a far worse outcome. I am so grateful for the excellent care I received.
