

Problem Based Charting

1. Navigate to your Plan Activity tab
2. Navigate to Problem List

3. Click on Advanced View if you want to go into a more detailed view of the patient's problem. Including relevant medications, labs, etc. See appendix on how to favorite that activity
4. Click on the name of the problem **A** to put in the overview and/or assessment and plan

- B** Overview: High level brief description that follows the problem from visit to visit
- C** Assessment & Plan Note: Current medical decision making for the problem for this visit
- D** Last Assessment & Plan Note: View last entry for problem. You can carry forward to current assessment and plan note by using

5. Once you completed your problem-based charting, remember to refresh your note on the right-side bar to bring the problems/MDM addressed during the visit into your note
